

## **Y.TIGER - HIGH VOLUME X-RAY SOLUTION FOR MICROFOCUS INSPECTION AT VIRTUALLY ANY VIEWING ANGLE**

- Large sample tray for high volume inspections
- High magnification at virtually any viewing angle
- Digital flat panel detector
- 16 bit real-time imaging chains
- Extensive automated image analysis
- Semi-automated and manual inspection
- Easy to use, collision-free design, safe operation

Designed to meet the rigorous needs of the printed circuit board assembly (PCBA), automotive, telecom, military and aerospace, medical device, and storage markets, the award-winning Y.Tiger microfocus X-ray solution ensures that only the highest quality assemblies leave the production floor.

The high volume microfocus solution Y.Tiger offers extensive functionality for thorough X-ray inspection supported by advanced technological solutions for easy operation. The Y.Tiger microfocus X-ray series is the ideal solution for real-time microfocus X-ray inspection offering outstanding ergonomics.
